4.b) Advanced Data Modelling and Form Design

Aim

To extend the Blood Donor & Camp Management System in Zoho Creator by implementing advanced field types and features such as lookup fields, image and file uploads, numeric validation, subforms, URL fields, rich text fields, digital signatures, and system-generated values for efficient management of blood donors, donation camps, donation records, and blood requests.

Theory

Advanced data modelling in Zoho Creator involves using specialized field types and advanced form components to collect, manage, and validate detailed information.

In this experiment, the Blood Donor & Camp Management System is extended conceptually with advanced fields and features to demonstrate lookup fields, image uploads, file uploads, numeric fields, subforms, URL fields, rich text fields, digital signatures, and system-generated values.

The advanced form design contains the following sections:

- Section E — Donor Identity & Verification
- Section F — Camp Coordination & Media Details
- Section G — Donation Details & Eligibility
- Section H — Declaration & System-Generated Values

Sections and Fields

Section E — Donor Identity & Verification

- Donor Record Lookup (Lookup field, links to the Donor Registration form)
- Donor Photograph (Image field)
- Donor Consent Document (File Upload field)
- Previous Donation Count (Number field)

Section F — Camp Coordination & Media Details

- Camp Record Lookup (Lookup field, links to the Blood Camp Management form)
- Volunteer Details (Subform field for recording volunteer information)
- Camp Information URL (URL field)
- Camp Poster (Image or File Upload field)

Section G — Donation Details & Eligibility

- Donor Lookup (Lookup field)
- Camp Lookup (Lookup field)
- Quantity Collected (Number field)
- Donation Date (Date field)

- Eligibility Confirmation (Decision Box or Checkbox)

Section H — Declaration & System-Generated Values

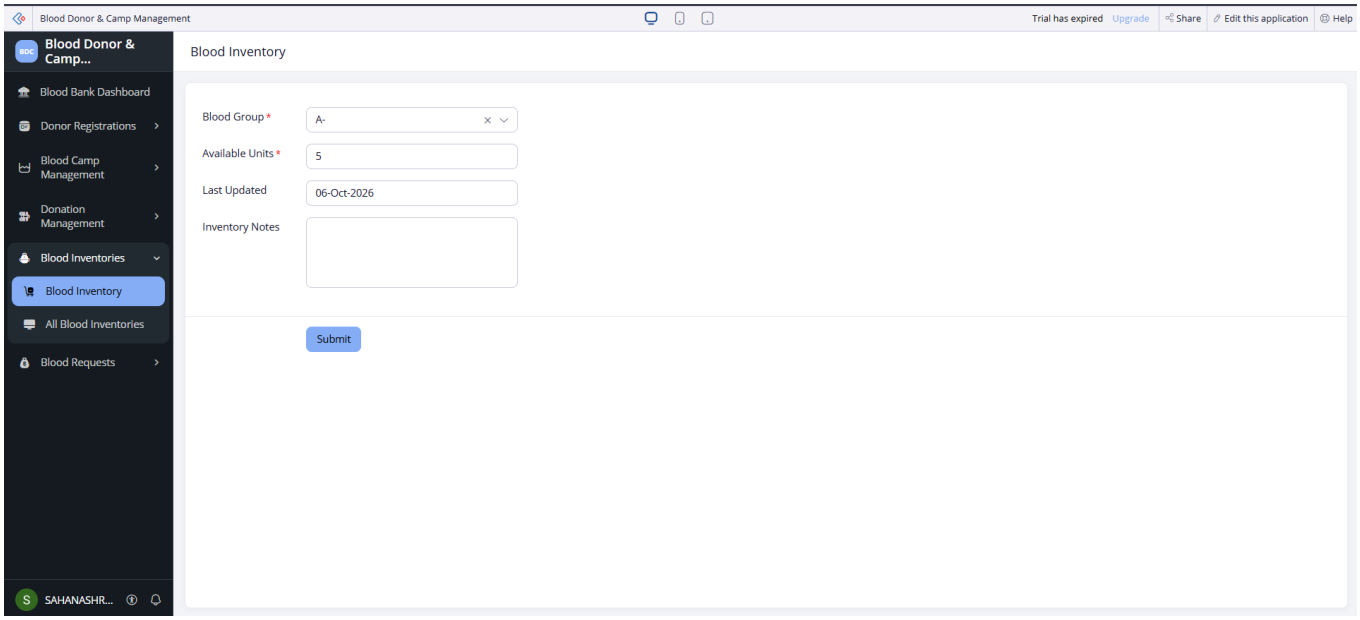

- Donation Guidelines Display (Rich Text field)
- Donor Consent Signature (Signature field, if available)
- Record Created On (Date-Time field, if configured)
- Donation Reference ID (Auto Number field, if configured)

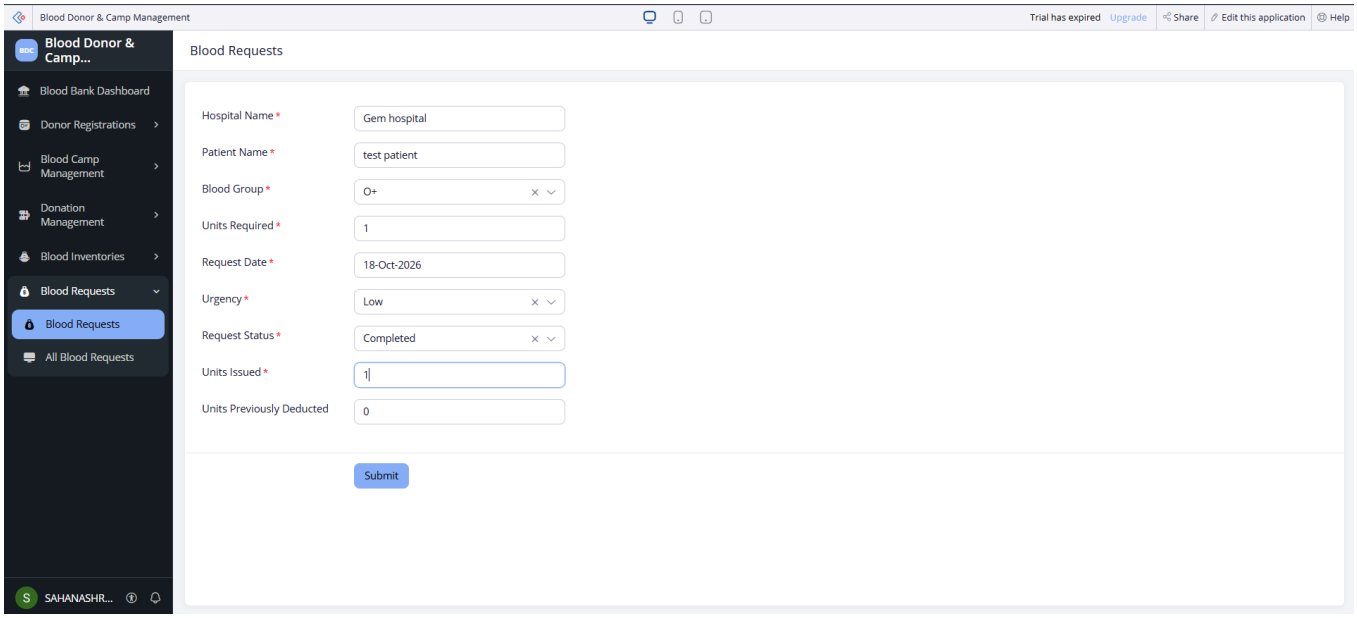

Note: These are proposed advanced fields for the experiment. They are not all part of your current application. Add them in Zoho Creator only if your assignment requires you to demonstrate these advanced features.

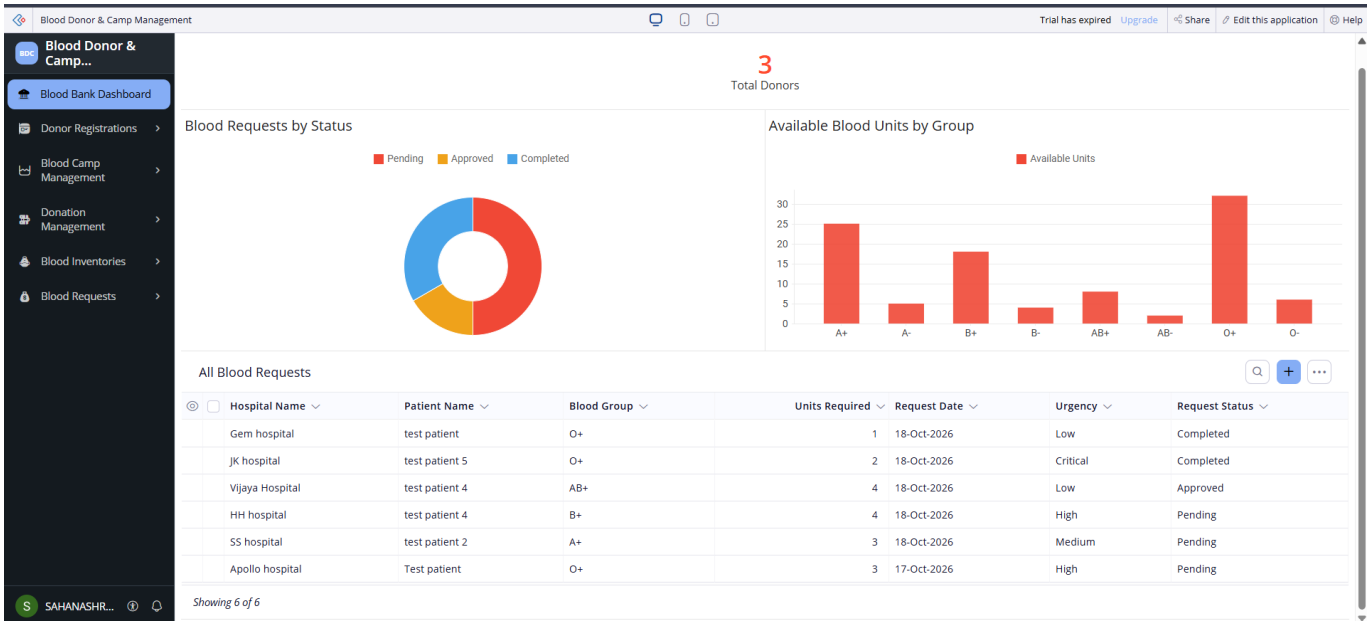

Procedure

1. Open the existing Blood Donor & Camp Management application in Zoho Creator.
2. Open the Donor Registration form to configure advanced donor information fields.
3. Add a Donor Photograph field using the Image field type.
4. Add a Donor Consent Document field using the File Upload field type.
5. Add a Previous Donation Count field using the Number field type.
6. Create the Camp Coordination & Media Details section in the Blood Camp Management form.
7. Add a Camp Information URL field and a Camp Poster upload field.
8. Add a Volunteer Details subform with fields such as Volunteer Name, Volunteer Contact, and Volunteer Role.
9. Open the Donation Management form and configure the donor and camp lookup fields.
10. Add or configure the Quantity Collected field using the Number field type.
11. Configure the Donation Date and Eligibility Confirmation fields.
12. Add a rich text field to display donation guidelines and instructions.
13. Configure a signature field for donor consent, if supported and required.
14. Configure system-generated date-time and reference number fields, where available.
15. Set the appropriate field properties and validation rules.
16. Save and preview the modified forms.
17. Enter fictional sample data and test the advanced fields.
18. Submit the sample records and verify the information in the corresponding reports.

Result

The Blood Donor & Camp Management System was designed for extension with advanced data modelling features, including lookup fields, image and file uploads, subforms, numeric fields, URL fields, rich text content, and system-generated values. These features support more structured donor, camp, and donation data management in Zoho Creator.
