5. Blood Donor & Camp Management – Zoho Creator Reports Suite

Aim

To design and configure a suite of reports in Zoho Creator for the **Blood Donor & Camp Management** application, demonstrating the use of different report types to organize, monitor, and analyze donor registrations, blood donation camps, donation records, blood inventory, and blood requests.

Reports Used Overview

Report Type	Report Name
List View	Donor_Registration_Report
Spreadsheet View	Blood_Inventory_Spreadsheet
Kanban View	Blood_Request_Status_Kanban
Calendar View	Blood_Camp_Schedule_Calendar
Chart View	Blood_Group_Distribution_Chart

Detailed Report Descriptions

1. Donor_Registration_Report (List View)

- **Purpose:** Displays registered blood donors in a structured, searchable table for easy donor record management.
- **Features:** Shows donor names, blood groups, contact details, eligibility status, and donor status. Records can be searched, sorted, and filtered where supported.

2. Blood_Inventory_Spreadsheet (Spreadsheet View)

- **Purpose:** Provides a grid-based view of blood inventory quantities for convenient monitoring and updating.
- **Features:** Displays blood groups, available units, last-updated dates, and inventory notes. Authorized users can review and update inventory records as needed.

3. Blood_Request_Status_Kanban (Kanban View)

- **Purpose:** Visually organizes blood requests according to their processing status.

- **Features:** Groups requests into categories such as Pending, Approved, Partially Issued, Completed, Rejected, and Cancelled, making it easier to monitor outstanding requests. Drag-and-drop status changes should only be described if enabled and tested.

4 Blood_Group_Distribution_Chart (Chart View)

- **Purpose:** Visually represents blood group distribution among registered donors.
- **Features:** Uses a suitable chart, such as a bar chart or pie chart, to compare the number of donors in different blood groups.

5. Blood_Request_Summary (Summary View)

- **Purpose:** Provides a concise overview of blood requests for administrative monitoring.
- **Features:** Groups requests by status or blood group and summarizes relevant information, such as the number of requests and units required, where supported by the report configuration.

Procedure

1. Open the Blood Donor & Camp Management application in Zoho Creator.
2. Navigate to the report section associated with each form.
3. Configure the donor registration list report with relevant donor fields.
4. Create or configure a spreadsheet-style inventory report for reviewing available units.
5. Group blood requests by request status for easier tracking.
6. Configure a calendar report using the Camp Date field.
7. Configure location-based reporting only if suitable address fields and map support are available.
8. Organize donation records by Donation Date where a timeline-style report is supported.
9. Configure pivot, chart, and summary reports using relevant blood group, request status, and quantity fields where those report types are available.
10. Open the reports in Live mode and verify that the displayed records and summaries are correct.

Result

The Blood Donor & Camp Management application was configured with reports and a dashboard to organize donor registrations, blood donation camps, donation records, inventory information, and blood requests. The configured reports were reviewed in Live mode to verify the presentation of the available records.
