5(b). Blood Donor & Camp Management – Zoho Creator Command Center Page

Aim

To design and build a centralized Dashboard Page in Zoho Creator for the existing **Blood Donor & Camp Management** application, providing a unified workspace to monitor donor registrations, blood donation camps, donation activities, blood inventory, and blood requests.

Page Elements Used

Page Element Type	Element Name
Panel	Total_Donors_Panel
Chart	Blood_Group_Distribution_Chart
Chart	Blood_Request_Overview_Chart
Report	Blood_Requests_Report
Form Access	Donor_Registration
Form Access	Blood_Camp_Management
Form Access	Donation_Management
Form Access	Blood_Inventory
Form Access	Blood_Requests

Page Layout (Section-wise)

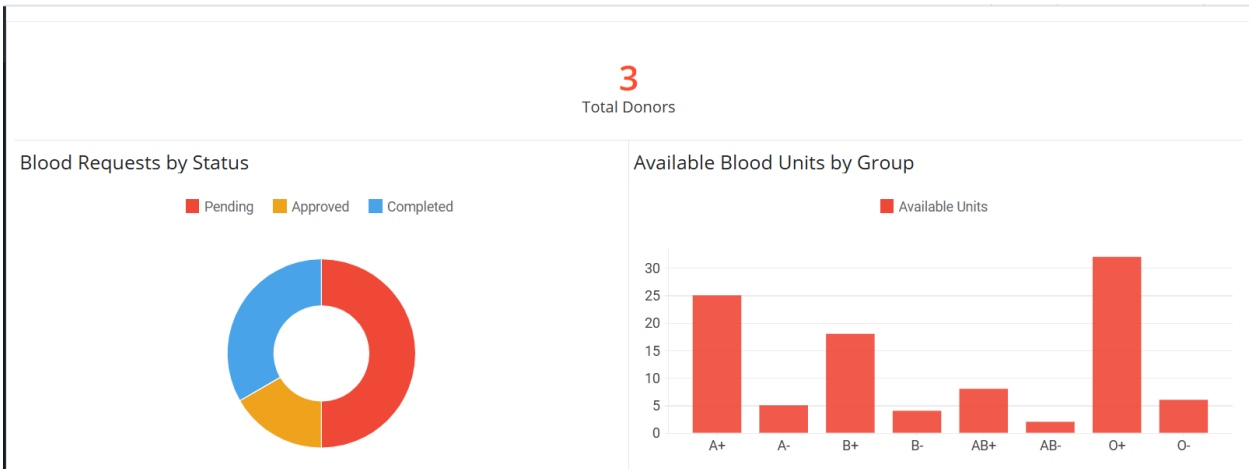

- **Section 1: Overview Strip**
    - Total Donors Panel: Displays the donor count to provide a quick overview of registered donors.
    - Blood Group Distribution Chart: Visually represents the distribution of blood groups.
    - Blood Request Overview Chart: Provides a graphical overview of blood request information.
- **Section 2: Blood Request Monitoring**
    - Blood Requests Report: Displays blood request records and their details, including blood group, units required, urgency, and request status.

- **Section 3: Donor Management**
    - Provides access to the Donor Registration form to register and maintain donor information.
- **Section 4: Camp and Donation Management**
    - Provides access to Blood Camp Management and Donation Management to maintain camp schedules and donation records.
- **Section 5: Inventory Management**
    - Provides access to the Blood Inventory form to view and maintain available blood units for each blood group.
- **Section 6: Request Management**
    - Provides access to the Blood Requests form to register new requests and manage existing request details.

The dashboard acts as a centralized monitoring page, while the individual forms and reports are used to enter, view, and manage application data.

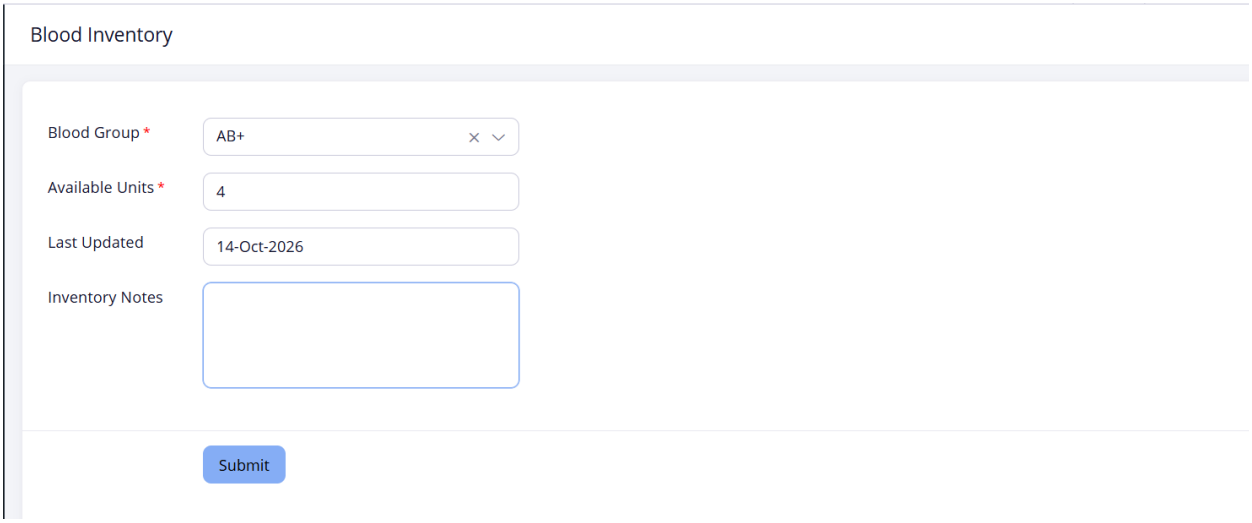

Procedure

1. Open the Blood Donor & Camp Management application in Zoho Creator.
2. Create a Page using the Page Builder.
3. Add a panel to display the total number of registered donors.
4. Add a chart to visualize blood group distribution.
5. Add a second chart to represent blood request information.
6. Add the Blood Requests report to the dashboard for quick access to request records.
7. Arrange the panel, charts, and report into a clear dashboard layout.
8. Save the page and open it in Live mode.
9. Verify that the dashboard components are visible and that the forms and reports can be accessed through the application.

All Blood Requests

Hospital Name	Patient Name	Blood Group	Units Required	Request Date	Urgency	Request Status
Gem hospital	test patient	O+	1	18-Oct-2026	Low	Completed
JK hospital	test patient 5	O+	2	18-Oct-2026	Critical	Completed
Vijaya Hospital	test patient 4	AB+	4	18-Oct-2026	Low	Approved
HH hospital	test patient 4	B+	4	18-Oct-2026	High	Pending
SS hospital	test patient 2	A+	3	18-Oct-2026	Medium	Pending
Apollo hospital	Test patient	O+	3	17-Oct-2026	High	Pending

Result

A centralized Dashboard Page for the Blood Donor & Camp Management application was created in Zoho Creator. The page displays the donor count, charts, and Blood Requests report, providing a unified interface for monitoring key information and accessing the application's forms in Live mode.
